

Technical Skills

Languages: JavaScript, TypeScript, Java, Python, SQL

Backend & APIs: Spring Boot, Node.js, Express.js, RESTful APIs, Microservices

Frontend: React.js, Next.js, Redux, HTML5, CSS3

Databases: PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS (EKS, EC2, S3, Lambda), Docker, Kubernetes, CI/CD, GitHub Actions

Testing: Jest, JUnit, Cypress, React Testing Library

Tools & Practices: Git, Agile/Scrum, Kafka, OAuth2, JWT

Experience

Software Engineer

Comcast

Jul 2025 – Present

Englewood Cliffs, NJ

- Build full-stack features for customer self-service portal serving **12K+ active users** using **React**, **Spring Boot**, and **PostgreSQL**, enabling customers to manage billing, preferences, and account settings without contacting support.
- Developed shared component library with **15+ reusable React components** (modals, forms, data tables) in TypeScript, now used by 3 other teams and reduced frontend development time on new features.
- Implemented end-to-end authentication flow using **JWT** and **Spring Security** with OAuth2 integration, handling secure session management across **15+ protected API endpoints**.
- Reduced React bundle size from **2.1MB to 850KB** through code-splitting, lazy loading, and tree-shaking — directly improved Lighthouse performance score from 62 to 89.
- Contributed to high-throughput analytics microservice using **Spring Boot** and **Kafka**, writing data ingestion components that process event streams and populate dashboards for the operations team.
- Authored **200+ unit tests** (Jest/JUnit) and **20+ integration tests** (Cypress), helping team maintain **85% code coverage** and establishing testing patterns adopted by newer team members.
- Configured **CI/CD pipeline** using GitHub Actions deploying to **AWS EKS**, with **Kafka**-based event streaming for analytics and monitoring via OpenTelemetry/Grafana dashboards.

Software Engineer

Infosys

Sep 2024 – May 2025

Atlanta, GA

- Built end-to-end customer onboarding system with **React**, **Spring Boot**, and **MongoDB** handling **2,500+ registrations/month**, replacing a legacy manual process that required support team intervention.
- Designed and developed **REST API with 12 endpoints** for user registration, document upload, and status tracking — implemented request validation and database transactions to ensure data integrity.
- Built responsive UI components using **React** and CSS Grid/Flexbox, tested across devices from 375px to 2560px — resolved mobile usability issues flagged in user feedback.
- Refactored form state management using **Redux** with normalized store structure and memoized selectors, eliminating lag on complex forms with 20+ input fields.
- Containerized full application stack with **Docker** and wrote **Kubernetes** deployment configs and Helm charts, enabling one-command deployments across dev, staging, and production environments.
- Wrote **160+ automated tests** across frontend (Jest, React Testing Library) and backend (JUnit), achieving **78% coverage** and catching regression bugs during sprint cycles.
- Worked closely with QA and product in 2-week Agile sprints — consistently delivered features on time and helped triage production bugs reported by end users.

Projects

AI-Powered Code Review Platform [Code](#)

React, Node.js, PostgreSQL, Redis, LLM APIs, GitHub API

- Built full-stack automated code review tool that integrates with GitHub webhooks, queues PRs with **Redis**, and generates review comments using LLM APIs — validated on **650+ pull requests** across 25 repositories.

Gesture-Controlled Virtual Mouse | [Paper](#) | [Code](#)

Python, TensorFlow, OpenCV | Springer ICIoT 2023

- **First-authored and published** peer-reviewed research paper on real-time hand gesture recognition system achieving **95%+ accuracy** at **<50ms latency** — built for accessibility applications.

Education

University of Georgia

Master of Science in Computer Science, **GPA: 3.6 / 4.0**

Aug 2023 – May 2025

Athens, GA

Coursework: Distributed Systems, Cloud Computing, Software Engineering, Database Systems

SRM Institute of Science and Technology

Bachelor of Technology in Computer Science and Engineering, **GPA: 8.6 / 10.0**

Aug 2019 – May 2023

Chennai, India
